Washington, DC 20554

Dear The Federal Communications Commission,

I do not want to pay more for my telephone service! I urge you to reject a flat fee proposal that would change how contributions are made to the Universal Service Fund. I am concerned that this proposal could make my current service unaffordable.

Under the flat fee proposal you are considering, people who make few long distance calls would pay the same as people or businesses that make many calls. In other words, low-volume and primarily residential customers would bear the same universal service fund burden as a high-volume residential or business customers. This is unfair!

I use my wireless phone for safety, security and convenience. I don't want to lose these benefits so that big businesses can pay less than their fair share. I urge you to reject the proposal to move the USF collection system to a flat-fee.

We are taxed to death on everything that some politician thinks they can pass legislation on while the salary of the people that put these politicians in office has stood still. Where will this end? Time to take a stand and speak up on all of this unfair taxation. Cut some of the perks and automatic pay increases of the executives and then there would be no need to tax us to death !!!

Keep the USF Fair!

Sincerely,

Marilyn Klein
